# ePAY POWERED BY NODUS® eBANKING FOR MICROSOFT DYNAMICS AX/D365

Today's customers expect the convenience of online bill payment.  
The good news? ...

Giving your customers what they want also saves your company time and money.

## Integrated Online Bill Pay

ePay offers the latest in online bill presentment and payment technology for enterprises. Send invoice notifications to your customers. Let your customers view and pay their invoices online. Eliminate double entry, wasted man hours, and endless journeys down a paper trail.

The ePay module provides real-time payment processing and eliminates double data entry. It seamlessly integrates the payment back to the accounting system and automatically applies payments to invoices.

## Your customers pay online

The screenshot shows a web browser window with the URL 'skassem2inPay/OutstandingInvoices.aspx'. The page title is 'Outstanding Invoices'. Below the title, there is a note: 'Note: Outstanding Invoices include any charges on a customer account that is not paid in full, such as invoices, debit memos, service charges, etc.' There is a search bar with 'Show Transactions' and 'By Transaction Date' dropdowns, and a 'Filter' button. Below the search bar, there is a table with columns: TRANSACTION#, CUSTOMER, PAY, DUE DATE, TRANSACTION AMOUNT, BALANCE DUE, DISCOUNT AVAILABLE, IF PAID BY, PAY IN FULL, ACCOUNT, and DISCOUNT TAKEN. The table has one row with transaction number 101000. Below the table, there is a 'SELECTED TRANSACTIONS' section with a table showing TRANSACTION#, TRANSACTION BALANCE, and PAYMENTS. The total balance is \$1,000.00. At the bottom, there is a 'PROCESS PREPAYMENT' section with a 'COMMENT' field and a 'PAYMENT' field. The total amount is \$1,000.00, and there is a 'PAY' button.

ePay's web portal provides point-n-click payment of invoices (via credit card or e-check).

## Accounts Receivable is updated

The screenshot shows the 'Journal voucher' screen in Microsoft Dynamics AX. The 'Date' is 3/6/2015. The 'Company' is 'SK Global'. The 'Account' is 'Bank of USA Operating'. The 'Description' is 'Individual payment - USA'. The 'Debit' is 1,000.00. The 'Credit' is 1,000.00. The 'Payment type' is 'Customer payment'. The 'Payment date' is 3/6/2015. The 'Payment method' is 'Bank of USA Operating'. The 'Settlement type' is 'Designated transactions'. The 'Posting date' is 3/6/2015. The 'Posting date' is 3/6/2015.

Payments made on the portal automatically settle the AX invoice and generate the AR payment journal. Voila, your staff does nothing to process the collection!

## Designed For the Microsoft Dynamics AX/D365™ Financial Series

Other Modules in  
the eBanking Suite

- › Positive Pay
- › eBankRec
- › AR eSettlement w/ Lockbox
- › APEFT Plus!
- › AREFT Plus!

**SK GLOBAL**  
SOFTWARE

## SIMPLE. FAST. FULLY AUTOMATED.

### Secure

With ePay, powered by Nodus Technologies' PayFabric®, merchants can remove the credit card entry point, transmission and storage of sensitive payment information from their environments. PayFabric is a PCI-DSS certified solution.

### Save

ePay gives your customers the ability to check invoices and payment history at their leisure, reducing your call center demands. Costly check processing administrative expenses are no longer required.

ePay for AX is a joint development project with Nodus Technologies, Inc. Nodus Technologies, Inc. is a leading provider of electronic payment, e-commerce and business process automation software.

NODUS' PayFabric® provides cloud-based electronic payment processing, designed with an innovative and secure storage algorithm.

### Your Choice of Gateways & Processors

You have the freedom to choose your preferred payment gateway without being tied to just one provider. PayFabric is constantly adding support for gateways and processors so you can choose the one that is right for you.

### STATE OF THE ART SECURITY

Unique Encryption & Tokenization Technology

PayFabric uses the innovative encryption and tokenization technology, providing worry-free security and Payment Card Industry (PCI) compliance.

### Hosted Payment Entry and Wallet Screens

Sensitive payment data and all PayFabric screens are securely stored and hosted in the cloud— not on your servers – simplifying PCI Compliance requirements.

### PCI-DSS Certified

PayFabric ensures that all aspects of the transaction process comply with Payment Card Industry Data Security Standards (PCI-DSS), putting your mind (and also your customers') at ease.

### Online Bill Pay

- › Secure and mobile-ready customer portal with account management
- › Real-time or scheduled electronic payment processing (credit card, eCheck)
